

**You're Busy.**

## Have Your Cybersecurity Compliance Done For You!

**Traditional compliance solutions** offer an online space to create and store compliance-related documentation and self-assessments.

**Managed cybersecurity compliance solutions** take it a step further. These solutions not only store compliance documentation but also provide the cybersecurity expertise to monitor, manage, and address technical issues that could jeopardize your compliance. This is not a DIY solution—Helion's cybersecurity and compliance experts handle everything for you.

## Managed Cybersecurity Compliance

### Why Helion's Solution Works:

- ➔ **Compliance, Cybersecurity, & IT working in sync**
- ➔ **No more time-consuming, biased self-assessments**
- ➔ **Pen test & vulnerability scans - handled for you**
- ➔ **Vulnerabilities impacting compliance addressed**
- ➔ **Cybersecurity experts proactively working for you**

### What True Compliance Looks Like

Compliance isn't just about filling out templates, doing self-assessments, and running pen tests and vulnerability scans that get filed away and forgotten.

True compliance demands ongoing planning, monitoring, action, reporting, and continuous improvement.

# Feature Comparison

The FTC requires dealerships to “develop, implement, and maintain a comprehensive information security program.”

This requirement demands the following:
